

COVID-19 Vaccine Quick Facts

3/29/2021

Let's Get Vaccinated!

COVID-19 vaccines are safe and effective and will help protect you, your family, friends and others from getting COVID-19. These vaccines have been carefully tested. The vaccine is one more way to help fight the pandemic.

Common side effects of COVID-19 vaccines

-  **sore arm**
-  **headache**
-  **fever**
-  **tired**
-  **chills, shaking**
-  **muscle pain**
-  **nausea**

IMPORTANT THINGS TO KNOW!

- The COVID-19 vaccine is **FREE** for all
- You can get a vaccine if you are uninsured or undocumented
- You will **NOT** be asked for proof of immigration status
- You can use your NJ Earned Sick Leave to get your COVID-19 vaccine

What about my personal information?

You will be asked questions about:

- the type of work you do
- where you live
- your health
- race/ethnicity
- date of birth, and
- gender

The state will not share your name or address. Getting the vaccine has **NO** impact on the Public Charge Rule.

Prevent COVID-19

It is important to continue the recommended health habits to prevent COVID-19 even after you get the vaccine. The combination of this vaccine with the actions below will offer the best protection from COVID-19.

wash your hands

Wash them often with soap and water.

stay home

Stay home for 24 hours after your fever goes away, but no less than 10 days from when you became ill.

don't touch your face

Touching your eyes, nose and mouth is an easy way for germs to get into your body.

stay 6 feet away from others

Keeping distance between people makes it harder for germs to spread.

keep sanitizer close

Use sanitizer with at least 60% alcohol, use it often and tell children and people around you to do the same.

wear a face mask

A cloth or disposable face mask helps prevent the spread of germs from one person to another.

avoid sick people

This helps you keep from being exposed to other people's germs. COVID-19 spreads most easily when people have symptoms.

eat right and exercise

Eat healthy and exercise to help your immune system and speed recovery from illness.
